Advisor by Dr. Rahim Assistant Professor of General Thoracic Surgery

## Clinical experience

### 1. General Surgery

My general surgical training at the Shiraz University of Medical Science at Shiraz, IRAN, began at the professional Unit. I quickly, became proficient in performing operation like cholecystectomy, gastrectomy, herniorrhaphy, thyroidectomy, esophageal surgery, as well as bowel resection and anastomosis of intestines, traumatic vascular injury, mastectomy and management of empyema, lobectomy and pneumonectomy, this extensive surgical training was extremely helpful during my practice as an assistant professor in General Surgery in Beheshti Hospital in Shiraz for one year. I undertook a variety of abdominal and thoracic operation including surgical emergencies.

### 2. General Thoracic Surgery

My thoracic surgical training began in Shiraz University with supervision of professors of General Surgery who had experience in lung resection, management of empyema and esophageal surgery. Subsequently I was appointed as a fellowship in general thoracic surgery in Tehran University of Medical Sciences with majority of experience gained in the surgical management of bronchiectasis, lung cancer, chest wall tumor, chest wall deformity, surgery on trachea and mediastinum with especial work in management of deep infected median sternal wound infection. I gained special experience in the management of tracheal stenosis, rigid and flexible bronchoscopy, thoracoplasty, sleeve resection of lung, esophageal resection, colon interposition, chest wall reconstruction and pericardiectomy. Also, I gained experience in the use of mediastinoscopy, single lung ventilation and diagnostic & therapeutic thoracoscopy.

From 1999 to 2006 I have been participated in transplantation program in Shiraz. Our Centre had more than 1300 kidney recipients during 15 years and 215 liver transplants. I actually did kidney transplantation and 1<sup>st</sup> aid in liver transplantation. I spent more than one year ( 1<sup>st</sup> July 2004 -4 August 2005) as a clinical fellow in Harefield Hospital in London, UK attached to intrathoracic organ transplant program . During stay in Harefield Hospital I have gained a lot of experience in general thoracic field and lung transplantation and review medical record of more than 200 lung transplant patients and familiar with early and late complication of thoracic transplantation. In 2011, I had short academic visitor of Raegan Hospital; UCLA, USA. In 2013 I was in Toronto General Hospital and in 2014 I had short academic visitor of Vienna Hospital ;Austria. I reviewed lung transplant program in all of them and I spent most of the time to observe lung transplantation with ECMO and Ex-vivo lung perfusion and a few thoracoscopic VATS and esophagectomy.

My current interest lies in lung transplantation, mediastinal surgery, tracheal surgery, endobronchial surgery, VATS, diaphragm and chest wall surgery and research on trachea and diaphragm replacement
